Dear National Fire Academy Student:

By now you should have received an email notification from the National Emergency Training Center (NETC) Admissions Office. This notification indicates your acceptance into the U.S. Fire Administration (USFA), National Fire Academy (NFA) "Command and Control of Fire Department Operations at Natural and Man-Made Disasters" (CCNM) course.

Congratulations on being selected to attend the USFA's/NFA's CCNM course.

This 2-week course is designed for fire officers who have the responsibility of commanding significant fire and rescue operations at catastrophic disasters. Some of the subjects covered in this course are advanced applications in incident command; command and control; Incident Command System (ICS)/Emergency Operations Center interface; evacuation; sheltering; and communications. The course will apply these subject areas to catastrophic events involving hurricanes, blizzards, civil disturbances, terrorism, hazardous materials releases, tornadoes, and floods.

Due to the complexity of the command and control procedures required of this course, it is imperative that you have a solid foundation in ICS. On the first day of class, you will be evaluated regarding your competency in this area. We strongly suggest that, prior to attendance, you make every effort to be proficient in this area. In an effort to assist you in this goal, the U.S. Fire Administration has developed 2 web-based, self-study courses that are equivalent to ICS-100 and ICS-200 and meet National Incident Management System (NIMS) requirements. Q0462, "Introduction to ICS for Operational First Responders" (I-100) and Q0463, "Basic NIMS ICS for Operational First Responders" (I-200) are both available on our website at <https://www.usfa.fema.gov/training/nfa/courses/online.html>.

The class graduation ceremony is an important part of the course. You are expected to attend this event. All departing travel arrangements should be made so that you do not leave campus prior to the class graduation.

The NFA classroom environment is computer based. Increased numbers of students and instructors are bringing laptop computers or other electronic devices to campus; you are responsible for the security and maintenance of your equipment. The NFA cannot provide computer software, hardware (which includes disks, printers, scanners, monitors, etc.), or technical support for your device. For your convenience, we do provide surge protector power strips at each classroom table.

Should you need to access the Student Computer Lab, it is located in Building D and is available for all students to use. The lab is open daily with a technician available Monday through Thursday from 1700 to 2100 (5 p.m. to 9 p.m.) and on Saturdays from 0800 to 1200 (8 a.m. to noon). The lab uses Windows 7 and Office 2013 as the software standard.

If you need additional information related to your course's content or requirements, please contact Mr. Richard Sexton, Incident Policy and Analysis Curriculum Training Specialist, at (301) 447-7687 or email at richard.sexton@fema.dhs.gov. Good luck, and I hope to see you on campus.

Sincerely,

A handwritten signature in black ink, appearing to read "Eriks J. Gabliks". The signature is fluid and cursive, with the first name "Eriks" being the most prominent.
