National Fire Academy

R0391 – Fire Inspection Principles 2: Inspection of Structures and Systems

Quarter:
ACE Credit:
IACET Continuing Education Units: 3.6

Length of Course: 6 Days (38 hr., 5 min. contact hours, Sunday – Friday)
Prerequisite: Yes
Curriculum: Fire Protection: Technical
Training Specialist: Keith Heckler
Instructor:
Instructor email/phone:
Classroom: J-
Meeting Time: 8 AM – 5 PM

Course Description (Catalog)

R0391 – “Fire Inspection Principles 2: Inspection of Structures and Systems.” This six-day course introduces the student to the fundamental methodology for application of the requirements for fire protection systems including detection, notification, fire control and extinguishment, and mitigation of fire-related hazards, with special emphasis on fire alarm and fire suppression systems.
Student Qualifications (Primary and Secondary Audience)

The course is designed for those individuals currently conducting fire inspection/code enforcement.

Course Scope (Goal)

The goal of the course is to provide students with a clear understanding of the different types of fire protection systems and how they impact safety inspection processes.

Course Objectives (Course Learning Outcomes – TLOs)

After successfully completing this course, you will be able to accomplish the following:

- Verify system components and established performance requirements for water-based fire protection systems.
- Determine if alarm and detection systems or equipment are operational, adequate, maintained and tested.
- Verify system components and established performance requirements for smoke management and control systems and equipment.
- Determine if automatic sprinkler systems and equipment are operational, adequate, maintained and tested.
- Verify system components and established performance requirements for water mist fire protection systems and equipment.
- Verify system components and established performance requirements for standpipe fire suppression systems and equipment.
- Determine if fire pump systems and equipment are operational, adequate, maintained and tested.
- Verify system components and established performance requirements for commercial cooking ventilation and fire protection components.
- Verify system components and established performance requirements for special agent systems and equipment.

Course Delivery Method

The National Fire Academy (NFA) offers specialized training courses and advanced management programs of national impact in an academic classroom environment on campus at the National Emergency Training Center (NETC) in Emmitsburg, Maryland. This classroom course is designed for the national level fire service officer from State and local fire service organizations. During this 6-day delivery, students will reside in dormitories provided on campus with classes conducted in classrooms designed for critical student/instructor interaction. All course materials are designed for interactive classroom environments, in either paper notebook or electronic formats.
**Course Schedule**

The purpose of the course schedule is to give you, at a glance, the required preparation, activities, and evaluation components of your course.

Course Resources (Instructional Materials)

In order to be fully prepared, obtain a copy of the required textbooks and other instructional materials prior to the first day of class.

Required Readings

The student must complete required readings during the course to be able to thoughtfully participate in discussions and activities.

None.

Suggested Reading/Resources

Suggested readings and resources are not evaluated, but may enhance the student’s understanding, serve as additional sources for citation and promote discussion of course material.

None.

Required Resources (Course Textbook)

Student Manual.

Supplemental Resources (Supplemental Course Textbook)

None.

Grading Methodology (Evaluation Procedures)

Course Grade

The required performance to successfully complete the course is attained by completing the class with at least a “C” or higher.

The following course grading plan should be used to determine the assigned course grade for each student in the class.

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numerical Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100</td>
</tr>
<tr>

<td>80-89</td>
</tr>
<tr>
<td>C</td>
<td>70-79</td>
</tr>
<tr>
<td>F</td>
<td>69 or lower</td>
</tr>
</tbody>
</table>
Course Outline

Introduction (Day 1)

Objectives
None.

Unit 1: Introduction to Life Safety Systems (Day 1)

Objectives

Terminal Objectives

The students will be able to:

1.1 Verify system components and established performance requirements for water-based fire protection systems.

Enabling Objectives

The students will be able to:

1.1 Identify the applicable standards for water-based fire protection systems.
1.2 Explain the functions of water-based fire protection systems and equipment.
1.3 Explain the in-service testing process for water-based fire protection systems.
1.4 Explain the annual inspection and maintenance processes for water-based fire protection systems.

Unit 2: Fire Alarm Systems (Day 1)

Objectives

Terminal Objective

The students will be able to:

2.1 Determine if alarm and detection systems or equipment are operational, adequate, maintained and tested.
Enabling Objectives

The students will be able to:

2.1 Identify the applicable standards for alarm and notification systems.

2.2 Explain the functions of alarm and notification systems and equipment.

2.3 Explain the in-service testing process for alarm and notification systems.

2.4 Explain the annual inspection and maintenance processes for alarm and notification systems.

2.5 Determine operational capabilities of alarm and notification systems.

2.6 Evaluate alarm and notification system test documentation for accuracy, completeness and code compliance.

Unit 3: Smoke Management (Day 2)

Objectives

Terminal Objective

The students will be able to:

3.1 Verify system components and established performance requirements for smoke management and control systems and equipment.

Enabling Objectives

The students will be able to:

3.1 Identify the applicable standards for smoke management and control systems.

3.2 Explain the functions of smoke management and control systems and equipment.

3.3 Explain the in-service testing process for smoke management and control systems.

3.4 Explain the annual inspection and maintenance processes for smoke management and control systems.
Unit 4: Automatic Fire Sprinklers (Day 3)

Objectives

Terminal Objective

The students will be able to:

4.1 Determine if automatic sprinkler systems and equipment are operational, adequate, maintained and tested.

Enabling Objectives

The students will be able to:

4.1 Identify the applicable standards for automatic sprinkler systems.
4.2 Explain the functions of automatic sprinkler systems and equipment.
4.3 Explain the in-service testing process for automatic sprinkler systems.
4.4 Explain the annual inspection and maintenance processes for automatic sprinkler systems.
4.5 Evaluate automatic sprinkler systems test documentation for accuracy, completeness and code compliance.

Unit 5: Water Mist Systems (Day 4)

Objectives

Terminal Objective

The students will be able to:

5.1 Verify system components and established performance requirements for water mist fire protection systems and equipment.
Enabling Objectives

The students will be able to:

5.1 Identify the applicable standards for water mist fire protection systems.

5.2 Explain the functions of water mist fire protection systems and equipment.

5.3 Explain the in-service testing process for water mist fire protection systems.

5.4 Explain the annual inspection and maintenance processes for water mist fire protection systems.

Unit 6: Standpipe Systems (Day 4)

Objectives

Terminal Objective

The students will be able to:

6.1 Verify system components and established performance requirements for standpipe fire suppression systems and equipment.

Enabling Objectives

The students will be able to:

6.1 Identify the applicable standards for standpipe fire suppression systems.

6.2 Explain the functions of standpipe fire suppression systems and equipment.

6.3 Explain the in-service testing process for standpipe fire suppression systems.

6.4 Explain the annual inspection and maintenance processes for standpipe fire suppression systems.
Unit 7: Fire Pumps (Day 5)

Objectives

Terminal Objective

The students will be able to:

7.1 Determine if fire pump systems and equipment are operational, adequate, maintained and tested.

Enabling Objectives

The students will be able to:

7.1 Identify the applicable standards for fire pump systems.
7.2 Explain the functions of fire pump systems and equipment.
7.3 Explain the in-service testing process for fire pump systems.
7.4 Explain the annual inspection and maintenance processes for fire pump systems.
7.5 Evaluate fire pump systems test documentation for accuracy, completeness and code compliance.

Unit 8: Commercial Cooking: Ventilation and Fire Protection (Day 5)

Objectives

Terminal Objective

The students will be able to:

8.1 Verify system components and established performance requirements for commercial cooking ventilation and fire protection components.

Enabling Objectives

The students will be able to:

8.1 Identify the applicable standards for commercial cooking ventilation and fire protection systems.
8.2 Explain the functions of commercial cooking ventilation and fire protection systems and equipment.

8.3 Explain the in-service testing process for commercial cooking ventilation and fire protection systems.

8.4 Explain the annual inspection and maintenance processes for commercial cooking ventilation and fire protection systems.

Unit 9: Special Agent Systems (Day 6)

Objectives

Terminal Objectives

The students will be able to:

9.1 Verify system components and established performance requirements for special agent systems and equipment.

Enabling Objectives

The students will be able to:

9.1 Identify the applicable standards for special agent systems.

9.2 Explain the functions of special agent systems and equipment.

9.3 Explain the in-service testing process for special agent systems.

9.4 Explain the annual inspection and maintenance processes for special agent systems.

Policies

Class Attendance and Cancellation Policy

Attendance

- You are required to attend all sessions of the course. If you do not, you may not receive a certificate, and your stipend may be denied.
• If you need to depart campus early and miss any portion of the course and/or graduation, you must make the request in writing to the NFA training specialist. The training specialist, in collaboration with the superintendent, may waive the attendance requirement in order to accommodate you with extraordinary circumstances as long as you complete all course requirements. If you receive approval for departing early, you must forward the approval to the Admissions Office so your stipend reimbursement is not limited.

**Student Substitutions**

Substitutions for NFA courses are made from waiting lists; your fire department can’t send someone in your place.

**Cancellations or No-Shows**

NFA’s mission for delivery of courses is impaired significantly by cancellations and no-shows. It is very difficult and costly to recruit students at the last minute. Currently there is a two-year ban on student attendance for students who are no-shows or cancel within 30 days of the course start date without a valid reason. If you receive such a restriction, your supervisor needs to send a letter to our Admissions Office explaining the cancellation/no-show.

**Course Failure**

If you fail an on-campus course, you will not be issued a stipend for that course. You can reapply for the failed course or any other NFA course and go through the random selection process. You don’t have to successfully complete the failed course before attending another NFA course.

**Student Code of Conduct Policy**

Students, instructors and staff are expected to treat each other with respect at all times. Inappropriate behavior will not be tolerated and may result in removal from campus and denial of stipends.

**Writing Expectations**

Student writing will conform to the generally accepted academic standards for college papers. Papers will reflect the original work of the student and give appropriate credit through citations for ideas belonging to other authors, publications or organizations. Student written work should be free of grammatical and syntax errors, free of profanity or obscene language or ideas, and reflect critical thinking related to the course subject matter.

**Citation and Reference Style**

Attention Please: Students will follow the APA, Sixth Edition as the sole citation and reference style used in written work submitted as part of coursework to NFA. Assignments completed in a narrative essay, composition format, abstract, and discussion posts must follow the citation style cited in the APA, Sixth Edition.
**Late Assignments**

Students are expected to submit classroom assignments by the posted due date (11:59 p.m. EDT/EST) and to complete the course according to the published class schedule. As adults, students, and working professionals, you must manage competing demands on your time. Discussion board postings submitted within 3 days after the submission deadline will receive up to a 20% deduction. Those that do not submit their discussion board postings within this timeline will receive a “0” grade for the week. Final assignment papers will not be accepted after the deadline. Any paper submitted after the deadline will receive a “0” grade for that assignment.

**Netiquette**

Online learning promotes the advancement of knowledge through positive and constructive debate – both inside and outside the classroom. Forums on the Internet, however, can occasionally degenerate into needless insults and “flaming.” Such activity and the loss of good manners are not acceptable in a professional learning setting – basic academic rules of good behavior and proper “Netiquette” must persist. Remember that you are in a place for the rewards and excitement of learning which does not include descent to personal attacks or student attempts to stifle the forum of others.

- **Technology Limitations.** While you should feel free to explore the full-range of creative composition in your formal papers, keep e-mail layouts simple. The NFA Online classroom may not fully support MIME or HTML encoded messages, which means that bold face, italics, underlining, and a variety of color-coding or other visual effects will not translate in your e-mail messages.
- **Humor Note.** Despite the best of intentions, jokes and especially satire can easily get lost or taken seriously. If you feel the need for humor, you may wish to add “emoticons” to help alert your readers: ;-), : ), ☺.

**Disclaimer Statement**

Course content may vary from the outline to meet the needs of this particular group.

**Grading**

Please review the following rubrics that explain how grades will be awarded.

Students who do not complete the entire course will be awarded an Incomplete (I) grade. In accordance with National Fire Academy academic policies, an Incomplete (I) grade must be removed by the end of the next semester following the course, or it automatically becomes a Failing (F) grade.

If you fail an on-campus course, you will not be issued a stipend for that course. You can reapply for the failed course or any other NFA course and go through the random selection process. You don’t have to successfully complete the failed course before attending another NFA course.

[http://www.usfa.fema.gov/training/nfa/admissions/student_policies.html](http://www.usfa.fema.gov/training/nfa/admissions/student_policies.html)
Academic Honesty

Students are expected to exhibit exemplary ethical behavior and conduct as part of the NFA community and society as a whole. Acts of academic dishonesty including cheating, plagiarism, deliberate falsification, and other unethical behaviors will not be tolerated.

Students are expected to report academic misconduct when they witness a violation. All cases of academic misconduct shall be reported by the instructor to the Training Specialist.

If a student is found to have engaged in misconduct and the allegations are upheld, the penalties may include, but are not limited to one or a combination of the following:

- expulsion,
- withholding of stipend or forfeiture of stipend paid,
- exclusion from future classes for a specified period; depending on the severity it could range from 1-10 years, and/or
- forfeiture of certificate for course(s) enrolled in at NETC.

Refer to NFA-specific Standard Operating Procedure 700.1 – Academic Code of Conduct and Ethics for more information.
